

Thank you again for binding a recent workers' compensation policy with Omega. Your office is authorized to issue all certificates of insurance. Unless the policy is with a PEO. For PEO policies you are not allowed to issue certificates – only the PEO can issue certificates on behalf of the client.

- Please make sure to confirm that the policy is active and current before issuing certificates
- Please be sure to use correct eff dates, policy number and named insured carrier. Omega should never be listed as the carrier.
- You cannot add waivers to the certs unless the carrier has issued the waiver endorsement onto the policy.
- There are no additional insureds or volunteer's coverage for this policy.
- Any other special requirement needed for a certificate of insurance must be approved by the carrier through Omega.

For questions about issuing certs for your policy holder, or for any WC service needs or questions please email our team at wc@omega4agents.com
